Additional Information

The Sportjet 460 offers supreme safety with no exposed propeller, easy boarding with the concealed bathing ladder, and a great feeling of stability and comfort that only a RIB can give. The convertible seat backrest can be folded forward to create a sun lounging area, Aft of this is the large bathing platform allowing easy access to and from the water.

Powered by a Rotax 4-TEC 150 Jet Propulsion System, the Sportjet 460 has speed built right in. Offering serious power at the flick of the throttle to give an exhilarating ride. Williams and BRP have teamed up to offer RIB customers an advanced propulsion system and boat package which takes the coastal sport RIB and yacht tender to a new level of sophistication.

Once experienced, a jet powered boat never fails to impress. Pin point handling, easy manoeuvring at low speeds and blistering acceleration give the Sportjet a unique feel on the water, add to this the supreme safety of no exposed propeller and you have an unbeatable combination.

The compact BRP jet propulsion system has allowed Williams designers to create a unique deck configuration in this size of RIB - we call it the Sportjet layout. Two rear facing seats lead on to a large platform area which can be used for swimming and watersports, giving the boat a practical space which would otherwise not be available on an outboard powered RIB. A removable ski pole gives a tow height essential for wakeboard enthusiasts. The helm seat backrest hinges forward creating a fully reclining sunbathing area for two people.

The Sportjet 460 instrument cluster provides the helmsman with full information to operate the tender effectively. Standard fitments include a folding helm console and removable steering wheel which lowers the profile of the tender for storage, a tinted windscreen for driver protection, and a convenient storage locker adjacent to the helm position.
